

## TYPE 29 ANGLED FLAPDISCS

### Why is Type 29 Flapdisc so special?

Type 29 flapdiscs are angled at 10°. Suitable for **AGGRESSIVE** grinding and cutting of excessive stock.

BCL Abrasives type 29 flap discs also comes in Zirconia alumina, Aluminium oxide and Ceramic grain.

#### Aluminium Oxide (Top Size) grain:

Top size properties for added cooling benefits. For general metals, alloys and steels.

#### Zirconia grain:

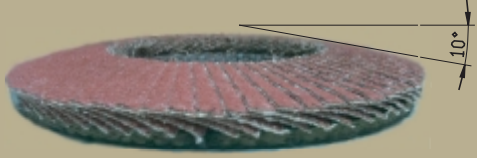

For general metals, alloys and steels. Runs cooler than A/O grain.

#### Ceramic grain:

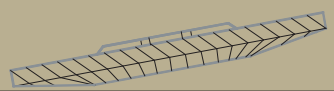

Suitable for Inconels, hard alloys and special metals.

#### Application:

Surface grinding, weld finishing, stock removal

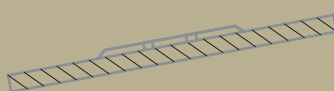

**Type 29**

Greater surface area for grinding and as a result, tends to be the most aggressive stock removal.

Best choice for speed and stock removal.

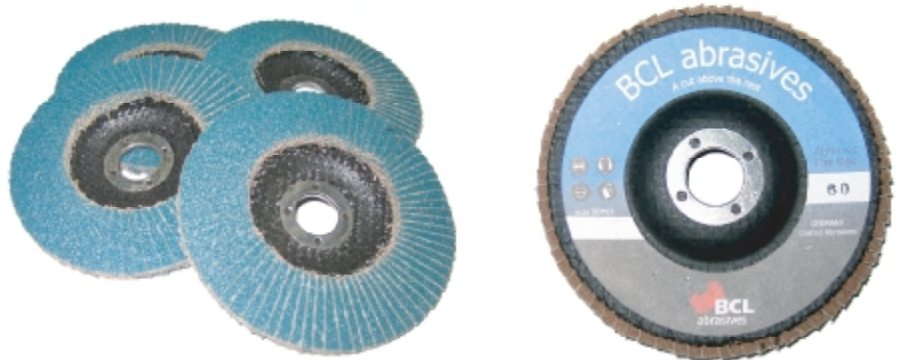

**Type 27**

Less grinding contact using T29 flapdiscs.

**MADE USING QUALITY ABRASIVES**

**VSM - Vereinigte Schmirgel - und Maschinen - Fabriken AG Germany**

Diameter	Hole	max	Grit Number				Ordering Number #	Box
			P40	P60	P80	P120		
4" (100mm)	16mm	11000	x	x	x	x	10	
4.5" (115mm)	22mm	11000	x	x	x	x	10	

#### Recommendation for use

Due to the tough abrasive grain, a high output angle grinder is require to achieve optimum grinding results.

A Cut Above the Rest
